

UNICORN II

All-Round Static Rope

The polyester cover of UNICORN II is balanced with a polyamide core to create the perfect ratio of low elongation and enough to absorb the impact, it meets both NFPA 2500 and CE EN1891A standards.

UNICORN II has high strength and good grip and softness, so it is easy to knot and handle during use.

The UNICORN II is a very special all-round semi-static rope for rappelling, caving, rescue, working at height, rigging and anchoring.

High strength

Softness and good grip

Excellent abrasion

Core and cover
perfect combination

Low elongation and
enough to absorb the impact
