

Super Armor-CG

Durable Chafe

Super Armor-CG is a lightweight and highly flexible braided polyester sheath, designed for smooth application. The outer layer of the sheath is coated with a uniform and durable polyurea coating, providing resistance against high temperature and various chemical substances. This coating effectively protects the internal rope from abrasion and cutting hazards, ensuring its durability and longevity.

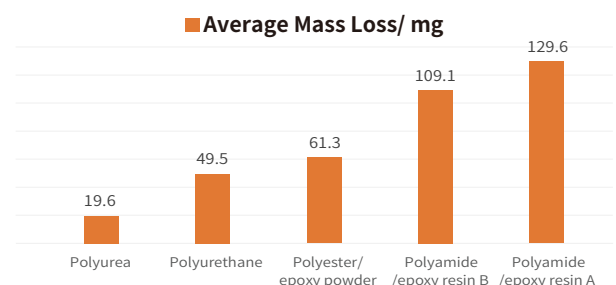

- ▶ Offering a range of color coatings
- ▶ Flexible and easy to install
- ▶ Resistant to cut and abrasion
- ▶ Polyurea coating provides flame retardant properties

Specification

| | |
|--------------------|-------------|
| Fits Rope Diameter | 10mm-60mm |
| Fiber | Polyester |
| Coating | Polyurea |
| Temperature range | -40°C~200°C |

▶ Larger Available By Request

▶ TABER wear mass loss test (1000 cycles/1000g)
TABER wear test follows the ASTM D4060 standard
