

OPTIMA™

*Premium HMPE
Synthetic Fiber Rope*

5

The OPTIMA™ Series is our premium rope line created by ROPERS, crafted from high-quality Ultra-High-Molecular-Weight Polyethylene (HMPE).

OPTIMA™ 5 is made of premium Ultra-High-Molecular-Weight Polyethylene (HMPE) fiber and is the highest-strength synthetic fiber rope available made by ROPERS.

Our OPTIMA™ 5 features a bright two-color anti-twist identification design which can effectively prevent rope distortion during operation, thereby avoiding loss of rope-strength.

The OPTIMA™ 5 ropes are suitable for all types of vessels, ranging from small boats, fishing vessels, yachts to barges, ferries, cruise ships, LNG carriers and even large container ships or bulk carriers. It is the premier choice for all vessels.

Diameter, weight and MBS are determined in accordance with ISO 2307:2019. Specifications are for unspliced strengths, strength will decrease by about 10% after splicing. Custom diameter and length and color available by request.

Warning: The minimum breaking strength must never be regarded as the safe working load of the rope.
