

# TARZAN

## Arborist Rope for Tree Climbing

TARZAN is a durable climbing rope, making it ideal for tree climbing. The 11.5 mm diameter rope is ideal for tree care operations. It ensures better grip, thus reducing hand fatigue.

TARZAN has obtained EN1891A certification. It is an ideal climbing rope for arborist, The special design sheath gives superior abrasion resistance. It comes with a splicing eye which can be easily pulled through mechanical friction devices. TARZAN feeds very smoothly through the popular mechanical friction devices on the market.

High strength

Low impact force

Special braided structure

Perfect for use in descender device
