

FALCON

Semi-Static Rope With Excellent Grip In Sheaves

A professional sandwich-type construction of braided layers. No sheath slippage. Our static rope provides a good quality in use and experience while descending. Furthermore, the permanent mechanical connection between the cores and the cover prevents bunching of the cover as the rope runs into the device.

- ▶ Material: Core/Nylon, Cover/Nylon
- ▶ The core and cover are interconnected at regular intervals.
- ▶ Soft and flexible, good wear resistance, better operation experience.
- ▶ The benefit of greater safety, longer lifetime, and good handling.
- ▶ Standard: EN1891A
