

# UNICORN II

## Green Line Recycled Semi-Static Rope

We are passionate about the continuous rope development. Environmental protection ropes are not only mean the concept of energy conservation and carbon reduction, but also our ultimate sustainable development goal. The Unicorn II green line is a rule rope suitable for a variety of environments, polyester rope cover makes it more wear resistant. The unique design makes it highly recognizable. After being discarded, the rope can be degraded in a short time, reducing the impact on the ecology and pollution to the environment.

- ▶ The core is constructed from renewable bio-based Nylon 56
- ▶ The cover is made from recycled PET, conserving valuable resources
- ▶ Green environmental protection, reduce pollution
- ▶ Good performance, close to popular polyester

Made Of Wastes

Low Energy Need

Low Carbon Emission

No Soil Erosion

Comparable Polyester

PA56 & Recycle Polyester

### Specification

Diameter	Weight	Mass of Bio-based	Mass of The Cover	Breaking Strength	Elongation	Number of Falls	Knotability	Impact Force	Standard
mm	g/m			kN				kN	
10.5	87	23%	45%	30	3.7%	≥15	1.24	4.9	EN1891A

▶ Can be customized

intertek **biobased** CE

**ROPERS**  
RELIABLE TO THE CORE

**ROPERS ROPE**
