

SHIELD™ PRO 11.5

High Performance Rope

The SHIELD™ PRO 11.5 is specially designed by the ROPERS as the ultimate rope for powered ascenders, ensuring the best performance and the long durability. The 100% heat resistant aramid cover, combined with the premium polyamide 66 core, the optimum cover/core ratio creates higher tensile strength, low elongation and superior handling characteristics. And the red inner wear indicator to signal when it is time to replace.

Essential for Rope Access professional who require a tough and durable work positioning rope with outstanding heat resistant properties. Tested according to NFPA2500 standards.

100% heat resistant
aramid outer sheath

High strength

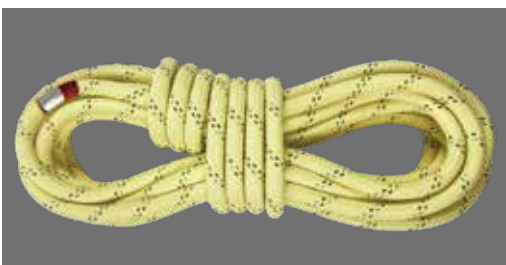

The red inner cover serves
as a clear indicator

Resistance to cyclic bending

Efficient lifting and
always compact
