

VORTEX MAX

Water Rescue Rope

Vortex Max is designed with polypropylene fiber in the cover and HMPE in the inner core. It has higher strength and can be used for multi person rescue. The rope is soft and easy to operate. It can be matched with a throw bag and it also be added with reflective strips, which can be used efficiently in a dark environment.

- ▶ Material: Core/HMPE, Cover/Multifilament Polypropylene
- ▶ Match with the throw bag, soft, light and easy to use.
- ▶ Float in water, with small volume but high strength and durability.
- ▶ It can be equipped with reflective strips, which can also be used efficiently when the light is dark.
